

# Apple Canyon Lake Fish Habitat Structures Map

## Legend

 Spawning Structures

0 1,000 2,000 4,000  
Feet

This diagram illustrates areas where fish habitat structures (cribs) have been placed over the years. Many are still in good condition, while some have deteriorated, and others have been destroyed by boats anchoring in them. All new cribs must be approved by the Conservation Committee and Apple Canyon Lake Board of Directors.

### **BE A HERO; TRANSPORT ZERO!**

**If you boat on another lake or river:** Live wells must dry 5 days to eliminate the spread of aquatic organisms. Do not dump minnows in the lake.
